

## How to Use Keyboard Overlay Strips

Arrange the strips as shown:

Bass Clef  strips are on the left

Treble Clef  strips are on the right.

Look at Middle C on the picture above – it's the white key just left of the two black notes in the middle of the keyboard.

Find Middle C on your keyboard and place the strips so that the black and white keys all line up as shown:

Don't worry if your keyboard is longer than the strips – as long as Middle C is correct, everything else will follow.
